School is back in session and that is why it is a good time to talk to your loved ones about binge drinking and the effects of alcohol on the liver. Even though there are over 100 liver diseases, alcohol related liver disease is responsible for almost half the cases of liver-related death in the United States and worldwide. Dr. Todd Sheer on our Medical Advisory Committee has answered many questions pertaining to alcohol-related liver disease including how much alcohol is too much, what are the effects on the liver and who is at risk. To learn more about alcohol and the liver and the importance of moderation click HERE to read the answers Dr. Sheer shares as we continue to educate our community on alcohol-related liver disease. Remember to Love Your Liver!
Did you know that you could donate a portion of your liver to someone in need? Your liver is the only organ in your body that regenerates making live donor liver transplantation possible. Here in Colorado we are so blessed to have some of the top hepatologists and liver doctors in the country. At the University of Colorado Hospital, Dr. Elizabeth Pomfret is chief of Transplant Surgery and is highly regarded in multi-organ transplantation and a world leader in living donation transplant with some of the most successful outcomes in the country! Alongside her is Dr. James Burton in Transplant Hepatology at the University of Colorado Hospital. This dynamic duo have been making waves in the world of live donor liver transplantation and changing the world of hepatology all together! Check out their section in our doctors notes HERE!

We are fortunate enough to have both doctors serving on our Medical Advisory Committee, so we want to give a huge shout out to both Dr. Pomfret and Dr. Burton as they stand alongside us to continue in our mission to promote, education, advocacy, support services and research for the prevention, treatment and cure of liver disease. Thank you Dr. Pomfret and Dr. Burton!
Who if any turned them in?

Join us for our FREE Liver Education Program on Saturday, October 6th from 9 am to 11:25 am at Holy Comforter Episcopal Church located at 1700 West 10th Ave., Broomfield, CO 80020 where we will have leading hepatologists and liver doctors speak on the following topics:

Hepatitis C in Adults and Adolescents with Dr. Gerond Lake-Baakar from Porter Adventist Hospital
Drug Abuse and the Liver - The Opioid Crisis with Dr. James Burton from University of Colorado Hospital
Alcohol Induced Liver Disease with Dr. Clark Kulig from Presbyterian/St. Luke’s Hospital
Non-Alcoholic Fatty Liver Disease and NASH (Non-Alcoholic Steatohepatitis) in Adults and Adolescents with Dr. Barbara Piasecki from Kaiser Permanante and
Liver Wellness: Diet, Exercise and the Healthy Plate with Elizabeth Corcoran, NP from Porter Adventist Hospital

The moderator for this program will be Dr. David Cronin from Porter Adventist Hospital
