## Exploring primary biliary cholangitis

October 27, 2025 1 min read

While [PBC progresses slowly](#) and many patients do not experience symptoms during the early stages of disease, there are many symptoms to look out for. In later stages of disease, patients may experience symptoms of cirrhosis. See below for the breakdown of potential early-stage and [late-stage PBC symptoms](#).

### Signs and symptoms of PBC

#### Early-stage PBC

- Fatigue
- Pruritus
- Abdominal pain
- Skin darkening
- Yellow or white bumps under the skin or around the eyes
- Dry mouth or eyes
- Bone, muscle and joint pain

#### Late-stage PBC after development of cirrhosis

- Jaundice
- Swelling of the legs and feet
- Ascites
- Varices
- Osteoporosis that may cause fractures
- Increased risk for hepatocellular carcinoma
