RICHMOND, Va. (WAVY) — The American Liver Foundation held its annual Liver Life Walk event in Richmond Sunday.

Hundreds of people participated in the walk, which happened from 9 a.m. to 12 p.m. at Bryan Park in Richmond.

The American Liver Foundation's Live Life Walk brings together all who've been affected by liver disease. According to the foundation, roughly 1,209 Virginians die from liver disease every year and 288 liver transplants were performed every year. The foundation's goal is to raise \$29,700 with the walk. Funds raised during the event are used towards liver disease research.

For more information, you can visit the American Liver Foundation's website [here](#).
