According to the American Liver Foundation, there were 11,458 liver transplants in the U.S. in 2024, with 604 of those donations coming from living donors. Partial liver transplants occur when a healthy adult removes part of their liver and gives it to someone whose liver is no longer functioning properly.

WVXU

Here & Now

On *Cincinnati Edition*, we discuss the impact of this procedure and how it's changing organ donation.

Guests:

- Alexander Bondoc, MD, surgical director of liver and intestinal transplantation, Cincinnati Children's
- Amanda Graham, partial liver transplant living donor

You can learn more about living liver donation [here](#). Or call a living donor coordinator at Cincinnati Children's at 513-636-4312 or 513-636-6794. An online donor questionnaire also is available [here](#).

Beginning at noon, call [513-419-7100](tel:513-419-7100) or email [talk@wvxu.org](mailto:talk@wvxu.org) to have your voice heard on this topic. You can catch a recorded replay at 8 p.m.
